大團仁安醫院的電腦系統，於4月15日被黑客惡意攻擊，《香港01》接獲消息及黑客要改由人手操作，有醫護憂增加出錯的風險。據悉，黑客曾向醫院勒索1,000萬美元（約7,800萬港元），惟院方未有支付。仁安醫院周四（18日）發公告承認遭攻擊，部份運作受到影響，但未有透露詳情。香港資訊科技商會榮譽會長方保僑稱，被入侵的原因多是涉事公司無安裝防毒軟件，甚或員工點擊釣魚網站導致。

In the first half of 2024, Hong Kong faced over 5,000 cyberattacks, with phishing incidents rising by 80% and affecting 73% of enterprises. These attacks resulted in significant financial and reputational losses, causing system disruptions, data breaches, and operational halts. How can we ensure top-tier security for our systems affordably?

Starting from September 23, HKEX's securities market will adopt a new arrangement to ensure continuous operation during severe weather conditions. Brokers must guarantee the accessibility and stability of their services and systems to deliver uninterrupted services to clients in adverse circumstances.

With these factors in mind, cloud service offers system security and stability in this era of Big Data.

eBroker Cloud Service streamlines software, hardware, and infrastructure management. Enjoy our secure cloud service without the need for hardware or software investments. Benefit from robust security features like multi-layered firewalls, strict access controls, and anti-DDOS protection to safeguard against unauthorized access. Regular antivirus updates and scans further enhance security.

What's on our Cloud Service Tick List?

- RELIABILITY – Strict environmental controls to protect systems from power failure and temperature extremes
- HIGH SECURITY – Firewalls and strict access control are in place with ongoing regular backup, windows security patches and hotfixes updates
- FLEXIBILITY – Easy and timely to subscribe for more resources for business expansion
- REDUCE COSTS – Minimal capital investment needs and no expenditure is needed to purchase new hardware and/or MS licenses when they become obsolete / EOL
